EPOXY FLOORING

Vitto cement

VITTOCEMENT is a decorative coating composed of cement, water-based resins, additives and mineral pigments that can be applied on a multitude of vertical and horizontal surfaces thanks to its great adherence. This construction material stands out because it is applied directly onto existing materials: tiles, plasterboard, floor tiles, marble, terrazzo or plaster, among many others. With hardly any work and a thickness of only 3 millimetres, a rapid renovation of spaces is achieved.

A cutting-edge cladding, jointless and suitable for both outdoor and indoor spaces. A continuous cladding that can be applied on floors, walls, stairs, ceilings, swimming pools and even furniture. Its versatility has led to its increasing presence in the refurbishment of private homes and in commercial premises and large surfaces such as sports centers, industrial buildings, hotels and restaurants.

VITTO offers you a wide range of possibilities and decorative finishes, where you set the limit. Give rooms a unique and personal character thanks to the different textures (thick, medium or thin); the wide variety of microcement colours; and the different finishes that our varnishes allow.

VITTOCEMENT PRIMER

Two component cement based primer which make the surface ready to apply the top layer coating, finish with Vitto cement top layer Fine or Medium.

USES: Construction works, Joints, Plaster, concrete, floors.

ANCHOR WITH: VITTOEPOX PRIMER, VITTOCRYL PRIMER

Vittostone

STONE CARPET is the ideal flooring for your home and offers a great alternative to traditional flooring. It is made of natural stone and Epoxy resin. The Open-Pored structure of the floor promises a pleasant, massage-like walking and allows easy cleaning.

Carpet Stones are easy to lay to achieve an intricate rustic design in pathways, driveways, patios, poolsides and ...

Vittofloor

When it comes to choosing new flooring systems for industrial use, garage floor coating, or any other surfaces, epoxy resin flooring truly stands out from other flooring options for many reasons. Epoxy flooring, other known as resinous flooring, is highly durable, customizable, sustainable, and decorative for any surface. What appeals most to epoxy flooring is its resistance to high levels of wear and tear, making it the most long-lasting flooring options.

Three kinds of epoxy coating such as SELF LEVEL, ROLLER MARK AND MORTAR EPOXY FLOOR COATING are available with each colour you choose.
